

New York Presbyterian Hospital

SharePoint Implementation and Site Migration Project

Published: August 2009

During 2009 NGenious Solutions, Inc. assisted New York Presbyterian Hospital to migrate an executive dashboard site from TIBCO Portal to SharePoint. In addition took on the project leadership role and assisted New York Presbyterian Hospital with all of the critical decisions surrounding their new SharePoint environment, helping implement a test environment, integrating with SQL Reporting Services and taking advantage of SharePoint for other applications.

Situation

New York Presbyterian Hospital initiated a high visibility project to migrate a site from TIBCO Portal platform to Microsoft Office SharePoint Server 2007 platform. TIBCO Portal solution is no longer a production solution and their annual support costs were getting to be more expensive to deal with. The existing site on the TIBCO portal was an executive dashboard site and hence was targeted at a really important audience within the organization. It was very important to perform a good job of the migration, so that the management would have a buy in on the new platform and approve using the SharePoint platform for all new web development projects.

New York Presbyterian Hospital already had a small SharePoint environment implemented and wanted to take advantage of the platform and cut their costs for supporting and maintaining TIBCO environment. To achieve this goal and ensure project success NGenious Solutions, Inc., offered its' technical expertise and project management skills to complete the site migration project. This site is being used by roughly 1000 employees including the management team.

Solution

During the site migration project NGenious Solutions, Inc. assisted New York Presbyterian Hospital with creating a project plan that mapped out all of the project milestones and the tasks associated with each objective. During the project, NGenious Solutions, Inc. guided the team from New York Presbyterian Hospital in all aspects of configuring and utilization of a SharePoint site. NGenious Solutions, Inc. helped design and customize a new theme for the executive dashboard site. NGenious helped customize and configure the SharePoint site for permissions as necessary for the executive dashboard.
